## General Telephone Makes Improvements

A project to expand telephone cable facilities in Elba, was announced by General Telephone Company.

Several miles of cable will be added to improve and expand local service, James Brown, district manager, said the project was started December 10 and is scheduled to be completed in the early spring.

The cost of the project is estimated at \$140,000. The new cable routes will make it possible for the company to meet a greater number of customer requests for private, two and four party lines. He also said service will be extended to some areas not previously in the system.

The larger cables carry literally hundreds of conversations in a sheath the size of a man's forearm. Signals traveling at the speed of light activate sensitive switching equipment at the central office. The switches automatically route the calls over another cable complex to their destination, Brown said.

Many miles of cable will also be removed as a part of the project.

The district manager said that plans for 1969 and 1970 call for continued improvements in both local and long-distance service for customers in the city of Elba.

The cable being installed above will serve the people of Smith Avenue and on up to Victoria. It also will serve the people in the Woodland Grove area.

Full-time undergraduate students who earn a quality point average of 2.7 or higher on a 3.0 grading scale are eligible for the Dean's List. Of the 56 students, 28 had a perfect score of 3.0.

The following students from Coffee County were named to the fall quarter Dean's List. Their grades are indicated: Theodore Winston Brunson, Elba, 2.7; Lynda Watson Clark, Enterprise, 2.8; Peggy Elaine Jeffcoat, Elba, 2.8; James Murdock McInnis, Elba, 2.7; and Kathy Andrews Windham, Enterprise, 3.0.

## City Council Meets Again 'Til Midnight

The Elba City Council held its first regular meeting of 1969 on Monday night. The meeting was held at the City Hall with all members present.

The first order of business was to hear a presentation on the advantages of a Gar Wood garbage truck. The city is considering buying a new truck to replace one of the two old ones presently being used. If the Gar Wood truck is used the truck and garbage body will cost between ten and eleven thousand dollars.

The mayor read a letter from Highway Director Bob Kendell, stating that there was no money available for four lane Highway 84 west in the area of Dorsey Trailers but it would be surveyed and as soon as money was available the paving would be done.

The council voted to make the necessary improvements of Rainbow Drive rather than close the road.

The city clerk was instructed to ask the Recreation Board to meet with the city at the first meeting in February.

Police Chief Jack Smart gave the police report for December. He stated that 22 arrests were made, 48 heard in Mayors Court, 35 found guilty and 15 found not guilty.

The council discussed the lack of parking space in downtown Elba and the numerous trucks that park in the mile of the street for extended periods.

City Clerk Harris Winston reported that the response to letters of collection on 1968 city licenses had been effective. All businesses in Elba have paid their 1968 licenses.

The council voted to hire a city recorder to handle all court cases presently being held by Mayor's Court. This will be effective February 1st. Attorney Terry Butts will be hired to fill this position. The job will be on a salary basis rather than fee basis which has been questioned by higher courts lately.

The council voted to donate \$100 to the Lions Club project of air conditioning the Elba High Auditorium. The council members voted to wholeheartedly support the fight against General Telephone rate increases. They voted to pay \$191.52 to the fund set up to fight them all the way to the Supreme Court. This figure is out at 8¢ per telephone in Elba and is the amount requested by the steering committee from the ten county area.

The city will sell the old 1965 police car to the highest bidder, according to instructions given to city clerk Harris Winston. He is to advertise for bids in the old car.

The council discussed the City's insurance program and voted to ask the City's insurance agent to attend the next meeting and suggest ways to cut the insurance expense on the city owned cars and trucks.

FOLLOWING THE FOOTBALL BANQUET . . . Jim Auchmuty, minister of the First Baptist Church and M.C. for the event; Johnny Sharpless, who signed a grant-in-aid with Alabama; Coach Steve Sloan, assistant coach at Alabama and guest speaker for the event; Coach Leon Atkins, head coach of the mighty Elba Tigers smile for the camera following the football banquet last Friday night. Over 200 people attended the event. Editor's Note: While developing this picture we got a clue as to how Jim Auchmuty always has a good answer for everything - he is always practicing - note the open mouth while everyone else is smiling for the photo. Your time now preacher!

SERVED COFFEE . . . Mrs. Eris Paul serves coffee to Coach Steve Sloan while his wife Brenda and Judge Paul looked on. The occasion followed the Athletic Banquet last Friday night and was in the Paul home on North Claxton Street. About twenty-five people were present for the informal discussion of everything in general and football in particular. Like what did really happen to Alabama in Jacksonville - Sloan says, "a friend would not ask!"

## Alabama Electric Co-Op Gets OK To Use Plant

A ruling by the U. S. Supreme Court recently has settled a seven-year-old legal battle and paved the way for the operation of a \$12 million steam generating plant in Washington County on the Tombigbee River.

Alabama Electric Co-Op, which has its headquarters in Andalusia, Alabama, Power attempted to clock construction of the new steam plant and to void the contracts between Alabama Electric and its member-owners. Alabama Electric is an electric cooperative which generates and transmits wholesale power to rural cooperatives, towns and industries and has its headquarters in Andalusia, Alabama.

Beginning in 1962, Alabama Power Company, a public utility company which is a subsidiary of the Southern Company which has its headquarters in Atlanta, Georgia, in a dispute over Alabama Electric's construction of a new plant near Jackson and a total of \$20 million expansion and modernization program.

Alabama Electric had won the approval of the state of its new plant, won a decision in U. S. District Court in Montgomery and had that decision upheld last year by a U. S. Circuit Court of Appeals at New Orleans. Alabama Power had objected to AEC

making long-term contracts with its members to provide them wholesale electricity and had tried to claim the contracts were in violation of anti-trust regulations.

RICHARD NIXON is going to realize a pay hike for president. Monday the House approved increasing the pay of the president from \$100,000 to \$200,000 and the Senate is expected to approve the increase later this week.

An increase in salary has also been recommended for members of Congress from \$30,000 to \$80,000; cabinet members from \$35,000 to \$60,000; district judges from \$30,000 to \$47,000; supreme court justices from \$39,000 to \$65,000; and the chief justice from \$40,000 to \$67,000.

Members of Congress are afraid the \$200,000 boost in their own salaries would be politically unpopular with the voters and many of them are urging the president to scale down the figure.

Actually I don't see how members of Congress can afford to live in Washington on the \$30,000 salary and I wonder why politicians will fight so hard to get there. I would much rather that they have a wage increase, otherwise they might have to

accept "pay" from other sources and that we don't want. The expense of staying in Washington is tremendous and the cost of entertaining alone cost a pretty penny, not counting the cost of a place to live, etc. Look at the trips they have to make back home to keep the voters happy. Perhaps they have "an expense account" that takes care of traveling back home and for entertaining, but if they do I haven't heard about it yet.

THE INTEREST RATE is creating quite a big to-do this week. Some predict that it will result in this country developing the biggest depression this nation has ever had. Added to that is that it will result in many bankruptcies and other hard to face problems.

The boost in interest rate was a jolt to the stock market which declined sharply again Tuesday. It had only started assuming its retreat after Monday's steep decline when the surprise news came that the big commercial banks were advancing the prime rate of loans to a new record of 7 per cent from the previous record of 6 3/4 per cent. It was the third time since December 2 this rate had been raised.

What had apparently been an exciting year apparently is an "exciting depression," according to experts, who state that the interest increase will cripple this nation in many ways, but let us hope that they are wrong and that things will smooth out. When our banks have to pay interest of 7 per cent for the money they loan to us you

can see what it will cost when it gets to the little man - or actually affect the big borrowers, also. Prices will continue to go up and up because of the interest that is required to get the money to expand, etc.

The only person who will even sort of avoid the results of this extremely high interest rate are those who do not need to borrow money. Those who have idle money would be smart to loan it at the high interest rate - that is if they can collect the principal back plus the interest.

This interest rate increase has business upset. It is the highest ever. The result could be bad.

GREETING THE WORKING person January 1st was an increase in social security taxes. Social security payment deductions from wage and salary checks are now 4.8 per cent of earnings up to \$7,500. This means that any employee with earnings of \$7,500 will pay \$374.40 in social security taxes. His employer will have to pay an equal amount in social security taxes, so this increase is affecting the pay check of the employee and seriously affecting the employer. The total tax rate in the name of "social security" will reach nearly 10 per cent of taxable payrolls. Nearly 10 per cent of every dollar up to maximum taxable earnings will go to the federal government to pay for social security and medicare - as much as \$748.80 per employee. And more increases in this tax are coming in the years ahead. By 1987 it will amount to 5.9 per cent each for employee and employer.

## G.M. Head Urges Cooperation to Solve Problems

"There is much business we and government can do together," J. M. Roche, chairman of General Motors, recently told industrial leaders in Chicago. "We can build upon three essentials of free enterprise: incentive, a free market, and management efficiency."

"Opportunity for profit is the basic incentive of business — and businessmen need make no apology for seeking it. When we earn a profit, we need not be defensive about it. The reward of profit is the prime reason for being in business."

Incentives Stating that businessmen have other incentives, he cited the pride of accomplishment, satisfaction in helping community and country, and the providing of opportunities for young people to develop and grow by doing more and contributing more. He said that the government can make a great contribution by keeping these incentives as free as possible from cumbersome restrictions.

He said that industrial leaders must bring to problems in the social area the same qualities that spell business success — integrity, experience, precision knowledge, responsibility, honesty, and dedication.

Communication "We must develop more effective communication among all segments of our society, between labor and management, teachers and parents, business

and the consumer, and — between government and business," Mr. Roche observed.

Misunderstanding is an inevitable consequence of separation. And, he noted, that there are many areas of misunderstanding between government and business.

For example, business in business is constructive and "has made possible much of our national economic progress," Roche explained. There is a serious misunderstanding of the concept of productivity and how it applies to wages and prices.

Productivity "An annual increase in productivity is not automatic, but must be earned, and re-earned, every year. Management each year must take off from a higher base... work as hard as we can to be as efficient as we can," Roche declared.

Plants of First Lady, an AAS prize-winning, compact marigold, are only 16-18 inches high; good for hedges, borders, and growing in pots.

A steady climb in the popularity of marigolds, now among the 4 most popular annuals, has caused plant breeders to bend their efforts to ward producing ever more floriferous, ever more usefully varied varieties.

Among the 1968 winners in the 2-year All-America Selections trials are 2 newcomers. Orange Jubilee, the second winner in the same new marigold class Golden Jubilee was a 1967 winner) completes the color range of this group. Like close relatives, Diamond Jubilee (yellow-flowered) and Golden Jubilee (with golden blooms), Orange Jubilee has the new "hedge" type growth with plants in a row so uniform and compact that it is possible to use them as an unclipped blooming hedge about 2 feet high. The 4-inch-wide blossoms, as you see from the illustration, are of the double, giant carnation-type. They appear on the plants earlier than

Synthetics have developed real social significance over the past few years. Due to wonderful advances in technology, textiles are helping to reshape our ways of living.

Rugs go outdoors, carpets climb the walls, elasticized fabrics stretch across roads to create new architectural forms. Limitations that blighted some of the earlier synthetics are fast disappearing.

For example, rayons take better color; nylons are more soil resistant; acrylics are fire-resistant. And polypropylene is an outdoor lover used as webbing for furniture or backing for carpets that will go where soft surfaces underfoot were never before possible.

All of this means greater freedom from housework, more colorful homes, and longer-lasting materials. It also means lower cost-for-quality ratios, which in turn will bring functional and esthetic advantages to lower-income families as well as more fortunate citizens.

1969 Caprice Coupe

No clowns. No hoopla. No funny hats. This is an event for the serious car buyer. The man who has X number of dollars to spend and is determined to get his money's worth and maybe more.

Come to a Chevrolet Showroom during our Value Showdown.

Ask the man to show you, on paper, how you can order most any

1969 Chevrolet with a big V8 and automatic transmission for less than you could last year.

Come in and spend some time. Dig, probe, ask questions, take notes. You owe it to yourself to be thorough. Go for a drive.

Get a free sample of Chevrolet's luxurious full-coil, cushioned ride. Shut the windows and see how fresh the interior stays, thanks to Astro

Ventilation. Feel the kick of the biggest standard V8 in our field.

Then go down the street or across town and see how we stack up against Those Other Cars.

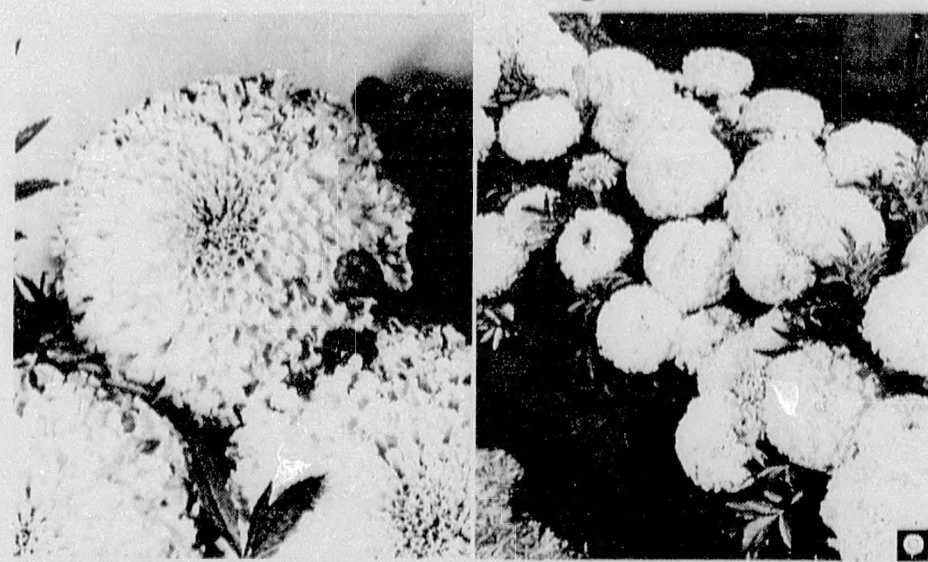

We think you'll wind up with a Chevy.

More people do, you know.

Putting you first, keeps us first.

121 S. Main St. Enterprise

## Accent on Marigolds

Flowering hedges, laden with bloom, result from planting Orange Jubilee, a new variety which starts flowering early, then continues late.

Those of the taller varieties with similar blooms and are held well above the foliage.

The second award-winning marigold, First Lady, also is a hybrid, also a vigorous in growth and early-blooming. It, too, has double blooms of the carnation type.

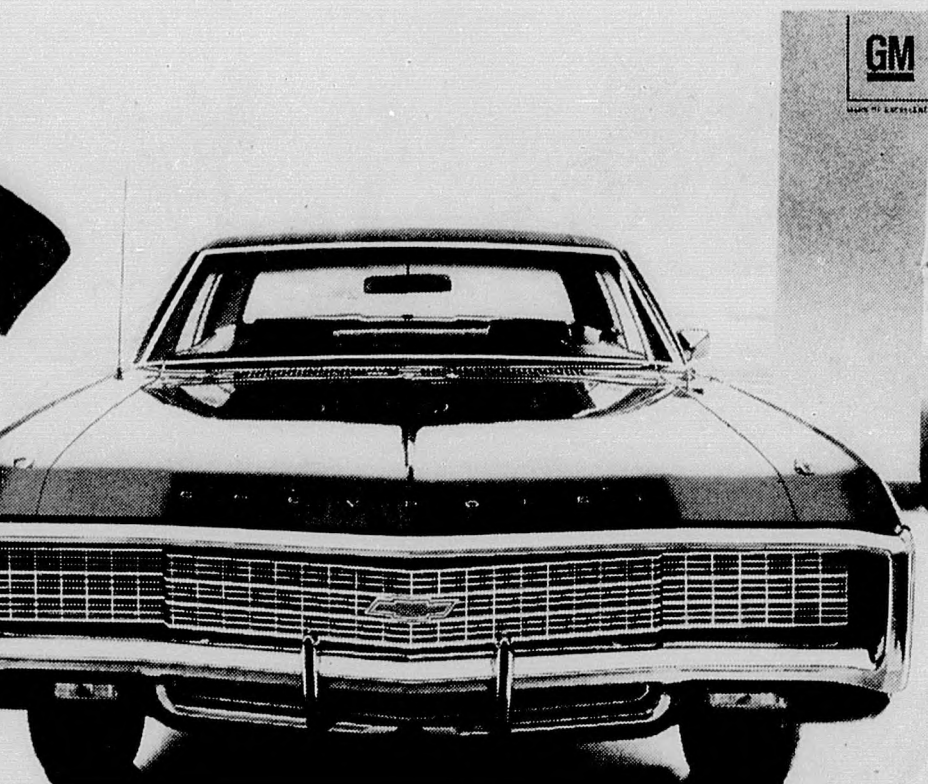

And, although lower growing (16 to 18 inches tall) it also can be used for a hedge. There the similarity ends, for First Lady has bright yellow blooms that are borne very freely and measure 3 inches across. Plants are exceptionally compact, flowers cover the tops.

Since flowers are your object in planting marigolds, start seeds indoors 6 to 8 weeks before frost-free time in your area.

Move the seedlings to a sunny place in the garden as soon as frosts are over and they'll be blooming long before plants of the same variety sown directly in the ground.

Growing geraniums from seeds is profitable. Top left, broken flower pots are placed in flat for drainage, soil mixture sieved on top. Bottom left, layer of milled sphagnum moss was added and seeds sown in it for disease prevention. Rows are being marked. Top right, seedlings are ready to transplant. Bottom right, transplanted. Soon they'll be set in the garden.

1969 Chevrolet with a big V8 and automatic transmission for less than you could last year.

Come in and spend some time. Dig, probe, ask questions, take notes. You owe it to yourself to be thorough. Go for a drive.

Get a free sample of Chevrolet's luxurious full-coil, cushioned ride. Shut the windows and see how fresh the interior stays, thanks to Astro

Then go down the street or across town and see how we stack up against Those Other Cars.

We think you'll wind up with a Chevy.

More people do, you know.

Putting you first, keeps us first.

The Chevrolet Value Showdown is on.

## BRAINSTORMS

With Ferrin Cox

It is real flattering to have people ask about our Brainstorms when we fall to print it one week. We promise it is out of sheer laziness and not to see if someone will ask.

The Elba City Council is continuing to talk about the parking in downtown Elba. We cannot say at this time what action, if any, they will take but rest assured, some of us will not like it whatever it might be.

Each year during the Christmas and 4th of July holiday season someone gets caught by an exploding firecracker in spite of state laws forbidding their sale or use. We popped them during our boyhood, and would hesitate before preventing our son from lighting some SNAP! ones. We would stutter when attempting to stop someone from selling them. The answer would be "They will just go somewhere else" which is right. If the city is enforcing it they go outside the city limits, if the county is enforcing it they go across the county lines. We remember going to Florida once when we couldn't get them in Alabama. Yet, someone must be guilty when a small boy or girl loses a hand or part of their face from the explosion.

We are unable to say if the peace talks are underway in Paris or not. The not so vital argument over sitting at a round or square table caused us to skip all articles pertaining to the peace talks.

The Elba Quarterback Club held a banquet last Friday night. Prior to attending the meeting we were thinking of what to say in this article about all the people who did not attend, thinking there would be a light turnout.

TROY HIGHWAY... ELBA, ALABAMA... PHONE 897-2297

After attending the delightful event with a room full of people, we can only say "Thank You" to those who did not attend. Everyone had a seat, everyone had plenty to eat, and everyone enjoyed it.

We were thinking of writing ugly words about people who talk loud at church and other places about keeping Coffee County a dry county and against whiskey in Troy, Ft. Rucker and even in the fine city of Elba. We are withholding those words though because they are not bothering us, so we will live and let live.

The Elba Chamber of Commerce is planning a Labor survey later this month. The survey will be aimed mostly at women. It is not just something to do while waiting for industry to drop in on Elba. There is presently a rubber goods manufacturing plant interested in locating in the City of Elba. They have looked the place over and like what they see. When called upon, women interested in working are urged to lend their support to this endeavor by co-operating with the survey person.

There is still a lot of speculation over "Will Governor Brewer call a special session." No announcement has come from the Governor's office but those close to him indicate that he is checking to be sure the money spent on a special session would be well invested. Bravo!

We dearly love a bargain and according to the ads in this week's Clipper clothing can be bought at a bargain this week. There are ads from four clothing stores giving price reductions ranging up to one-half off on clothing of all sorts. Gangway, here we come!

# HOSPITAL

Persons admitted to the Elba General Hospital during the period of December 31 and January 8 were the following:

Jacqueline Carroll, Betty Sue Morris, Verlin Whitfield, Sara F. Manwaring, Elmer Rowe Marler, Drexel Cook, Mary Alice Whitman, Charlotte Farmer, Ann W. Hall, Van City Danford, Myrtle Lee Kelley, Basil Whitman, Etta Crocker, Jessie Bell Rowell, Mamie Jacobs, Allie Rachals, M. N. Martin, Nettie Jackson, Foye Merle, Drexley Jerry Moore, Dannie Ray Marler, Wallace Smith, Jud Corley, Bill Bruce and Gail Watkins.

Persons discharged as of this time are:

Jacqueline Carroll, Betty Sue Morris, Verlin Whitfield, Rowe Marler, Drexel Cook, Myrtle Lee Kelley, Roy McDowell, Sue McDowell, Agnes Rogers, Mamie Lee Fillman, Olie Dyess, Louie Hooks, Dula Mae Goodson, Maude Faris (expired), Mary Cranford, Pauline Gentry, Robert Hussey, L. C. Hataway, Belinda Archie.

## Eleven Bucks Killed In Final Deer Drive

Eleven bucks in the three to six-point range were taken in the eighth and final open deer drive at Ft. Rucker's Wildlife Association Saturday.

Participating in the hunt were 103 men on standpups, 111 dogmen and game wardens.

The drive culminated the season's organized deer hunting which totaled 104 deer brought in by a lucky few of the 1,641 participants in the season's eight drives.

Individual deer stalking continues until sundown Monday (Jan. 13). The squirrel season also ends on that day, still current are the quail and rabbit seasons which end on Feb. 28 and 20 respectively.

In the office for Ft. Rucker hunters is the turkey season which runs from March 20 through April 25.

**Cities in Flames**  
NEW YORK—Short of nuclear war, it would be hard to imagine fire destroying nine American cities in the next 70 years. Yet, the Insurance Information Institute notes that in 1968, 185 of 196 fire towns in the United States reported major portions of New York City, Charleston, S. C., Portland, Me., Chicago, Boston, Jacksonville, Birmingham, San Francisco and Chicago, Mass.

He continued, "The service provided by these new examination machines will afford every new driver the opportunity to have eyes evaluated prior to being allowed to drive. This is another step toward putting more competent and safe drivers on our highways."

When you add it all up, print advertising—the kind you read in the pages of this newspaper—makes sense. And because it measures up to the buying habits of first consumers, print makes sales. Most people read—and then buy. Don't you?

The Elba Clipper

## COFFEE NEWS & CHAT

BY SARA E. HUTCHINSON

**FREEZE-DRIED FOODS**  
Contrary to what their name suggests, freeze-dried foods are dehydrated, not frozen. When properly packaged, they store well at room temperature in any climate for as long as two years.

Onions and soup mixes are the most familiar members of the freeze-dried food family. Now new freeze dried instant coffee has been added to the growing list of available products.

Freeze-dried foods reconstitute easily. You just add a specific amount of liquid and let the product stand for a short while.

— 30 minutes at the maximum. The liquid may be hot or cold water, or it may be syrup for such products as strawberries or water mixed with lemon juice for such products as fish. Once rehydrated, the foods return very closely to their normal appearance and are ready to cook or eat.

The process is still relatively expensive but with increased volume prices will likely decline.

**SHADES**  
Many cloth shades do all sorts of decorating tricks since they now feature colors galore, interesting textures and fresh designs. They are often dramatic enough to act as the sole window treatment. But whether used alone or with draperies and curtains, window shades can contribute a new look of the entire decor.

Houseplants, like most other plants, need feeding occasionally. Inadequate fertilizer levels may be the key to poor growth problems. But some gardeners should also check light intensity, duration of light and temperature.

Most indoor gardeners over-fertilize in the winter simply because the drabness of winter draws their attention to plants. Plants actually use less fertilizer in winter months because there is less light and the days are shorter.

One of the best times to add fertilizer is when you make your original soil mix. You should use slightly less than one teaspoon of ten-ten-ten fertilizer to each six-inch pot of soil and one-third of a teaspoon to each four-inch pot. Once plants are established they need fertilizer only about once a month.

**SAP-SUCKERS**  
Remember last summer if we are going to have safe drivers on our highways? The Governor said, "I must begin by upgrading our methods of testing potential drivers. It's a lot easier to correct driving problems hereafter the driver gets out on the highway."

Through use of the machines, each applicant will be scientifically tested to determine if his vision meets the present standards which are uniform in most states. Those who fail the eye test will be referred to an eye specialist for professional examination and corrective glasses or training.

The machines being employed by the Department of Public Safety are now being used by most large industries to screen their employees on a continuing basis for visual acuity. Use of the machine rather than the antiquated eye charts will mean that each applicant will be professionally tested under constant control.

SAFETY—Short of nuclear war, it would be hard to imagine fire destroying nine American cities in the next 70 years. Yet, the Insurance Information Institute notes that in 1968, 185 of 196 fire towns in the United States reported major portions of New York City, Charleston, S. C., Portland, Me., Chicago, Boston, Jacksonville, Birmingham, San Francisco and Chicago, Mass.

He continued, "The service provided by these new examination machines will afford every new driver the opportunity to have eyes evaluated prior to being allowed to drive. This is another step toward putting more competent and safe drivers on our highways."

## It's a woman's WORLD

BY MARY LEE

It used to be when a young woman said she was a chemist, everybody looked at her with awe. Today, any homemaker worth her sodium chloride makes use of a fine chemical vocabulary whenever she plans a nutritious meal.

How many times have you heard or said, "How about a nice cold glass of H<sub>2</sub>O?" Most everyone knows that two atoms of hydrogen and one of oxygen is the formula for water.

If a recipe calls for a teaspoon of sodium bicarbonate, you might need a pinch of it. You'll undoubtedly reach for the baking soda. And when monosodium glutamate is mentioned, it's no problem to pick up your favorite flavor intensifier off the seasoning shelf. You name such as "miso."

Although most cooking ingredients are sold in supermarkets today, you can still buy some special ingredients at the drug store. For example, you might need alum for crisp cucumber pickles, or ascorbic acid to keep home-canned fruits from darkening, or oil of peppermint to flavor a mince sauce.

Young mothers are well aware that baby's formula requires lactose, the chemical term for milk sugar. In meal planning you also

use a chemical vocabulary when you think of nutrients. Protein, carbohydrate and fat will be balanced in a meal, and essential minerals such as calcium, phosphorus, iron will be added along with vitamins to keep your family healthy.

Answers: (a) sucrose—(b) fructose or levulose—(c) lactose—(d) maltose—(e) glucose—(f) dextrose.

following test, and see how many sugars you can call by their chemical names.

## LEGAL NOTICES

NOTICE

Notice is hereby given that the City of Elba, Alabama, proposes, by resolution hereafter to be adopted, to take action as by law provided, to close and vacate Thomas Street, between Stroude-Mire and Jones Street, in Mulberry Heights, Elba, Alabama.

Now therefore this is to notify all interested persons that hearing is set to hear protest, if any there be, by the Council of said City on the 30th day of February, 1969, at 7:00 o'clock p.m., at which time you may appear and be heard.

To: Mrs. Annie Smith, 9082 Lampson Avenue, Garden Grove, California 92641; Mrs. Julia Carlock, 1177 East 75th Terrace, Kansas City, Missouri 64131; and To Whom It May Concern:

Notice is hereby given that Augustus Owen McCall and Robert Henry McCall, as Executors of the Last Will and Testament of Gertrude Page Owen, deceased, filed their report, accounts and vouchers for a final settlement of their administration on the 19th day of December, 1968, and that the 14th day of January, 1969, has been appointed the day to hear said settlement.

Done this 19th day of December, 1968.

J. O. English, Clerk of Probate 12/26/3tc.

**STOCKHOLDERS MEETING**  
The annual meeting of the stockholders of the Elba Exchange Bank, of Elba, Alabama, for the election of directors and the transaction of any other business that may come before the meeting, will be held at the office of said Elba Exchange Bank of January 13, 1969, at the hour of 6:00 o'clock.

Mary A. Lee, Secretary 12/19/4tc.

**ORDINANCE CREATING OFFICE OF RECORDER IN THE CITY OF ELBA, ALABAMA**

Duties: Responsibilities and Term of Office Thereof.

Be It Ordained By The City Council Of The City Of Elba, Alabama, As Follows:

Section I, That there be and there is hereby established the recorder's court in the City of Elba, Alabama.

Section II, That there be and there is hereby established the recorder's court in the City of Elba, Alabama.

Section III, That there be and there is hereby established the recorder's court in the City of Elba, Alabama.

## LEGAL NOTICES

NOTICE

Notice is hereby given that the City of Elba, Alabama, proposes, by resolution hereafter to be adopted, to take action as by law provided, to close and vacate Thomas Street, between Stroude-Mire and Jones Street, in Mulberry Heights, Elba, Alabama.

Now therefore this is to notify all interested persons that hearing is set to hear protest, if any there be, by the Council of said City on the 30th day of February, 1969, at 7:00 o'clock p.m., at which time you may appear and be heard.

To: Mrs. Annie Smith, 9082 Lampson Avenue, Garden Grove, California 92641; Mrs. Julia Carlock, 1177 East 75th Terrace, Kansas City, Missouri 64131; and To Whom It May Concern:

Notice is hereby given that Augustus Owen McCall and Robert Henry McCall, as Executors of the Last Will and Testament of Gertrude Page Owen, deceased, filed their report, accounts and vouchers for a final settlement of their administration on the 19th day of December, 1968, and that the 14th day of January, 1969, has been appointed the day to hear said settlement.

Done this 19th day of December, 1968.

J. O. English, Clerk of Probate 12/26/3tc.

**STOCKHOLDERS MEETING**  
The annual meeting of the stockholders of the Elba Exchange Bank, of Elba, Alabama, for the election of directors and the transaction of any other business that may come before the meeting, will be held at the office of said Elba Exchange Bank of January 13, 1969, at the hour of 6:00 o'clock.

Mary A. Lee, Secretary 12/19/4tc.

Section IX, That there be and there is hereby established the recorder's court in the City of Elba, Alabama.

By Tom Casaday, County Extension Chairman

**PASTURES**  
Joe Bell of 308 Highland Avenue in Enterprise has recently bought some land and is planning to start a beef cattle herd. He was in the office a few days ago for information on establishing Coastal Bermuda grass. We recommended that he try the improved Coastal Bermuda which is called Coast-Cross. This is an improved variety of Coastal. Late February is a good time to sprig Coastal Bermuda grass.

**SOIL TESTING**  
Several commercial fertilizer and lime businesses in the county are paying the \$1.00 per sample cost of soil samples that are sent to the laboratory at Auburn. For many folks this is a free service and hundreds of people in the county are taking advantage of this. Our peanut and corn and cotton committees of the County Extension Council recommended that we urge farmers to send in samples to the lab. I agree with this completely for this is one risk that we can eliminate. It seems sort of foolish to guess at fertilizer and lime needs when it is so easy to get laboratory analysis. We have supplies at our office and also in the agri-business firms in the county.

**COMPOST PILE**  
Mrs. Gordon Cain who lives for a number of years in the Basin Community and now lives in Opp wrote me a few days ago about how to set up a compost pile out of leaves. She is having the same trouble with leaves that a lot of other people have. I looked up the information and sent it to her and some of you also might be interested in ways to use these leaves for fertilizer. To establish a compost pile, build out of boards or logs a pen to hold the leaves. A pen 2 feet wide, 5 feet long and about 3 feet deep will hold a lot of leaves. Use about a 12 inch layer of leaves, then an inch or two of soil or manure and then about 15 pounds of 5-8-8 fertilizer. Be sure to water thoroughly and keep wet. If you have questions, contact me and I will send you more detailed information.

**MIXING INSTRUCTIONS**  
Many times you spray your trees and lawns and other areas to control insects and diseases and directions state "so many

say 2 pounds per 100 gallons of water, simply use 2 tablespoons wettable powder in one gallon of water.  
If the recommendations call for 2 pints per 100 gallons of water, mix 1 level teaspoonful of the insecticide into 1 gallon of water for each pint that is recommended. In other words, 1 tablespoonful of each pint that is recommended per 100 gallon of water for each gallon of water for each gallon you wish to prepare.

**REDUCE PROBLEMS**  
Burning dormant Coastal Bermuda grass at least four to six weeks before new growth is sprigged in the spring is good insurance against damage from diseases, insects and winter weeds. Burn all fields, Hub.

**Livestock Dealer Is Suspended By USDA**  
D. C. Herndon, operator of the Samson Livestock Auction, Samson, has been suspended as a registered livestock dealer and marketer agency for violating bonding regulations under the Packers and Stockyards Act, the U. S. Department of Agriculture said.  
He operates in southeastern Alabama.  
Mr. Herndon suspended starting Dec. 30, 1968, until he complies fully with bonding regulations.  
Mr. Herndon was also ordered to cease and desist from doing business under the P&S Act without

filling an acceptable bond.  
The order—like a permanent injunction—is issued to insure future compliance with the Act.  
Mr. Herndon consented to the order in answering the administrative complaint issued by USDA's Packers and Stockyards Administration (P&SA). He waived oral hearing.  
He admitted USDA jurisdiction and neither admitted nor denied the other allegations.  
The P&S Act is a fair trade practice law. It promotes and maintains fair and open competition in the marketing of livestock, poultry and meat.

ELBA, ALABAMA 36324, THURSDAY JANUARY 16, 1969

NUMBER 26

# The Elba Clipper

SENIOR MEMBERS of the 1968 Elba Tigers were presented plaques and pen sets at the recent football banquet. The plaques were furnished by the Elba Quarterback Club and presented to the boys by Coach Leon Atkins. The pens were furnished by Dorsey

Trailers and presented by Ben Brock.  
Pictured here are from left: front row - Mr. Ben Brock, Johnny Martin, Keith Baker, Eddie Cooper, Dean Smith, Jerry Hanchey, Coach Atkins, Back row - Johnny Sharpless, Brice Paul, Joel Martin and Tony Mulatz. Not shown is Douglas McNeil.

## Boat Numbers Must All Be Current

Conservation Director Joe W. Graham announced that the moratorium on issuing citations to operators of boats not currently registered or numbered has expired.  
Water Safety Division Chief Tom G. Shackelford pointed out that the registration number appearing on a current boat registration certificate is the only number that can be displayed on the boat. The 4" X 14" number decal issued with the 1968-69 registration certificates, if the NRTA and AARP.

Shackelford said a boat owner has the option of using the number decal issued, or affixing the issued number by paint or decals of their own choosing. The numerals and letters must be three inches in height, properly spaced and of the color which contrasts with the color of the boat's hull.  
Coffee County voting registrars will hold a five day registration session in Enterprise from January 20 through 24 and in Elba from January 27 through 31.  
Hours of registration are from 9 a.m. to 3 p.m. less an hour for lunch, daily.

## Miss O'Neal To Talk In Elba January 28th

Miss Gwen O'Neal will be the guest speaker at the Elba Chapter of American Association Retired Persons at their regular meeting on January 28th. The meeting will be held at the Elba Country Club.  
Miss O'Neal has had a varied career, beginning as an English teacher in Ohio and West Virginia. She has written two books also. She worked for many years with the American Red Cross and during the last several years has devoted her time to working with older people through the NRTA and AARP.

Dr. E. M. Warr, of Elba, is among those registered for the 46th Annual Southeastern Educational Congress of Optometry to be held February 15-18, at the Regency Hyatt House in Atlanta.  
The professional vision care practitioner will hear lectures by some of the Nation's most noted authorities in the ophthalmic field. More than 2,000 persons from 20 states are expected to attend.

MISS GWEN O'NEAL

**Dr. Warr To Attend Meeting In Atlanta**  
Dr. E. M. Warr, of Elba, is among those registered for the 46th Annual Southeastern Educational Congress of Optometry to be held February 15-18, at the Regency Hyatt House in Atlanta.  
The professional vision care practitioner will hear lectures by some of the Nation's most noted authorities in the ophthalmic field. More than 2,000 persons from 20 states are expected to attend.

## Enterprise To Offer Police Degree

Enterprise State Junior College is planning a new two-year degree program in police science.  
President B. A. Forrester described the new program in announcing the receipt of \$9,100 grant from the federal government for student grants and loans, and to a few students planning law enforcement careers. Forrester said 80 percent of the money must go to working officers and 20 percent to students.  
Forrester said an advisory committee of law enforcement leaders from throughout Southeast Alabama would be appointed to help junior college officials plan content and scheduling of the special courses.  
ESJC was the only Southeast Alabama educational institution to receive a grant under the 1968 "Streets" act.

To take full advantage of the available money, Forrester said, the junior college is encouraging interested officers to apply now and meet the general education requirements before beginning the specialized courses. Further information is available through the office of the president or from Dean Joseph Talmadge.

## Senator Allen To Support Tax Relief

Senator Jim Allen announced he would take an active role in support of a bill that would double the income tax exemption from \$600 to \$1,200 for each individual.  
Such a bill, Senator Allen said, has been reintroduced in the House of Representatives where the bill reaches the Senate.  
The Senator said the House bill attracted 29 cosponsors, and substantial Senatorial support could be expected when the bill reaches the Senate.  
"The \$600 exemption," Senator Allen remarked, "is no longer realistic or just in view of the increased cost of feeding, clothing, and maintaining a member of a family."  
The effect of the bill, the senator said, can be illustrated, for example, by a family of four, who are presently entitled to a total exemption of \$2,400, under the proposal supported by Senator Allen, a family of four could take advantage of \$4,800 from the gross income in computing their taxable income.

## January 31 Deadline For W-2 Forms

Friday, January 31, 1969, is the deadline for employers to give employees their 1968 W-2 forms, showing the amount of earnings, income tax withheld and social security taxes. W. T. Coppinger, District Director of Internal Revenue for Alabama, said.  
Forms W-2 have to be filed with income tax returns and those who have received all of them when they file their returns.

Auburn University undergraduates ranking in the upper five per cent scholastically for the fall quarter ending in December are on the honor rolls announced by the deans of each school.  
From this area are: Elba: Janet Murphree, Business; Larry D. Carter, Engineering; Enterprise: Emily C. Moates and John A. Moates, Education; Lem Motter, Ellis and Joseph Edwin Johnson, Engineering; New Brockton: Charles Davis Carter, Jr., Engineering.  
Representatives of the company have held meetings with the Industrial Board, Chamber of Commerce and City officials. These meetings and discussions were to assure what it needed and to assure Elba that the company was what Elba needed to continue to prosper.

## Alabama Alumni To Meet Soon

The Coffee County Chapter of the University of Alabama Alumni Association will hold its annual meeting at Bayley's Restaurant in Enterprise on Tuesday evening, January 28, 1969, at 7:30 o'clock P.M. This will be a dutch treat dinner meeting and a sea food buffet will be served. An interesting program is planned. Among those expected to attend from the University are: Mr. Malcolm Laney, Field Representative of the National Alumni Association; Coach Pat Dye of the University Football Coaching Staff; and Coffee County's own Tommy Weigand of the Alabama Crimson Tide.  
All Alabama Alumni and their families are invited and urged to attend. Reservations are necessary, and may be made by calling Robert E. Cannon, office, 897-2438 or Mrs. Ben J. Brock, home, 897-2522.

Plans are now being made by the Chamber of Commerce and the Industrial Board to conduct the requested survey on Friday, January 24th and Saturday, January 25th, at the Elba plant.

THANKS MR. VAUGHAN . . . Jerry Brown is shown presenting Mr. Oscar Vaughan, Jr., with a letter acknowledging Vaughan's many years of service as Treasurer of the March of Dimes.

IN THE LOWER PHOTO Brown is surprised by Jaycee President Dwight Wells as he is presented a letter commending him for his years of service to the March of Dimes. Brown had planned the presentation to Vaughan but the presentation to him was not told in advance and he seemed visually a little embarrassed at the attention directed at him.

## New Plant Interested In Locating In Elba

A large rubberized apparel manufacturer has shown a strong interest in locating a plant in Elba. The Elba plant would employ approximately 400 people, mostly women.  
Representatives of the company have held meetings with the Industrial Board, Chamber of Commerce and City officials. These meetings and discussions were to assure what it needed and to assure Elba that the company was what Elba needed to continue to prosper.  
Both groups seem to be satisfied that they are compatible and all that is lacking now is a labor survey by the Chamber of Commerce to indicate to the company that there is an ample number of people within a twenty-five mile radius that might be interested in such employment. Plans are now being made by the Chamber of Commerce and the Industrial Board to conduct the requested survey on Friday, January 24th and Saturday, January 25th, at the Elba plant.

He was trained as a radio repairman and has been assigned to a unit of the Aerospace Defense Command at Tyndall AFB, Fla. The airman is a 1965 graduate of Elba High School.  
His wife, Anne, is the daughter of Mr. and Mrs. Coston Wilkerson, Rt. 1, Kinston, Alabama.
